DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 26 is rejected under 35 U.S.C. 102(b) as being anticipated by Yamanaka (5751383).

Yamanaka discloses (col. 26, lines 13-30), as in claim 26, a display unit (see figure 48) enabling monocular observation of a magnified virtual image larger than a pixel portion by looking at the pixel portion with one eye, comprising the pixel portion (467) near to an observer, a light source (460) at a position distant from the observer, a magnifying optical system (462) between the eye and the light source, wherein the pixel portion is located before the magnifying optical system and the display unit enables observation of the image of the pixel portion, without magnification, by looking at the pixel portion with both eyes.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowability: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 1-13, wherein the claimed invention comprises an image display means arranged two-

dimensionally, a plate-shaped illumination means having *fine light emitting points arranged two-dimensionally corresponding to the pixels* and being placed on the backside of the image display means, and *fine optical elements* for introducing light emitted from the fine light-emitting points, which are *arranged two dimensionally corresponding to the pixels*, as claimed. The combination of all the claimed features are not anticipated or made obvious by the prior art and all of said features are relied upon for a determination of allowability.

Response to Arguments

4. Applicant's arguments with respect to claim 26 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
